Chapter 1
Rotten Dilemma

Humans

인간 (人間)

"*Free spirited people*"

Humans are not very strong and have a short life span of 100 years. However, some live pretty interesting lives.

Unlike the other races whose spirit can be purified and reborn, human spirits have the potential to float freely (like a ghost).

If a human dies and has regrets, they can become an evil spirit. Some of these humans are born because of prayers and under these circumstances, they can live a mortal life.
